## No one deserves to be spied on! We all have a right to campaign for change without fear of state abuse.

Police Spies Out Of Lives is a campaigning support group working to end the sexual and psychological abuse of campaigners and others by undercover police. We support people deceived into intimate relationships by undercover officers. Together we fight to expose this immoral and unjustified practice, and the institutional prejudices behind these abuses.

These postcards illustrate the kind of people who found themselves the targets of the disgraced #spycops units, and some of the campaigning going on at the time.

The full set of eight postcards is now available, at radical bookshops and online: <u>www.housmans.org.uk</u>, with all funds raised going towards the ongoing campaign.
